## Project Analysis

Cost Approx for 200 ml.	Per Glass `
Flavours Cost	0.27
CO <sub>2</sub> Gas Cost.	0.09
Sugar Cost @ 38/- kg.	1.04
Disposable Glass	0.40
R.O. Water Expanse	0.10
Electric Consumption	0.20
Other Miscellaneous Expenses	0.02
<b>Total Cost Per Glass</b>	<b>2.12</b>

- \*Project report is based on actual feedback from customer.
- Note : 1. Water fitting, CO<sub>2</sub> Cylinder, RO System purchased by Customer Side.  
 2. Tax, Transportation & packing charges paid by customer.  
 3. Company does not responsible for any damage during transit.

## Features

### Stainless Steel

Use 304 inner tank & SS Body, for corrosion resistance and better hygiene.

### Proper Drainage System

The extra large SS drainage tray prevent splashing & ensure fast drainage.

### PUF Insulation

PUF insulated chiller tank is designed to save energy and reduce temperature loss for great performance in power cut areas.

### Syrup Tank

Stainless steel double insulated High capacity tank with safety valve, CO2, and Syrup, regulation terminal for smooth operation.

### Digital Controller

Digital Temperature display makes easy to set chiller temperature with auto cut of and restart.

### Powerful Compressor

Faster cooling and surprising low power consumption with branded & Standard Compressor

### Condenser

High quality copper tubing with metallic & axial fans in heat exchanger maintains excellent heat transfer properties for faster cooling.

### CO<sub>2</sub> Regular

High quality CO<sub>2</sub> regulator with brass fitting & PSI meter for safe & control CO<sub>2</sub> distribution to system.

### Valves

Highly standard with international quality USA imported electromagnet pistons valve

### Carbonator

Stainless steel big size carbonate Tank with safety valves and sensor probe to ensure safe, strong and hygiene soda supply.

### Eco-friendly Long Lasting Graphics

Uses Good Quality Media & Ink for Exterior Graphics

### Easy Movement

Heavy castor wheels for easy movement.
